SUMMARY

Computer Science student at Lovely Professional University, currently undergoing training at Cognizant in the Quality Engineering and Assurance domain. Strong foundation in Java, problem-solving, and software fundamentals. Hands-on experience building full-stack and AI-integrated applications using React.js, Solidity, and OpenAI APIs. Focused on developing scalable solutions and continuously deepening technical skills.

TECHNICAL SKILLS

Languages	Java, JavaScript, Python, Solidity, SQL, HTML/CSS
Frontend	React.js, HTML, CSS
Backend / APIs	RESTful APIs, OpenAI API, ethers.js
Web3	Smart Contracts (Solidity), Ethereum (Sepolia testnet), MetaMask
Automation & Testing	Selenium WebDriver, TestNG, Page Object Model
AI / GenAI	LLM fundamentals, Prompt Engineering (basic), OpenAI APIs
Data & BI	MySQL, Hadoop, Tableau, Power BI (DAX, dashboards)
Tools & Platforms	Git, GitHub, VS Code, IntelliJ, Linux, AWS

TRAINING

- Cognizant Technology Solutions | QEA Domain Trainee** 2025 – Present
Chennai, Tamil Nadu
- Undergoing structured training in Java, software testing principles, and automation engineering practices.
 - Built a Selenium + Java + TestNG automation suite using the **Page Object Model** for three flows on a live travel-booking site (cab booking with dynamic future-date generation, form validation error capture, and dropdown value extraction).
 - Practicing problem-solving in Java using collections, loops, and structured programming patterns.

PROJECTS

- MetaMask Wallet Interface with AI Query Handling** | *React, ethers.js, OpenAI API*
- Built a conversational interface that lets users query Ethereum wallet data through natural language.
 - Used the OpenAI API to interpret prompts and route them to wallet read operations such as balance checks and recent transactions.
 - Integrated MetaMask via ethers.js for wallet connection and read calls on the Sepolia testnet.
 - Tech:** React.js, ethers.js, MetaMask SDK, OpenAI API, JavaScript
- HarCoin – Ethereum Token DApp** | *Solidity, React, ethers.js*
- Developed and deployed a custom token smart contract on the Ethereum Sepolia testnet.
 - Built a React.js front-end integrated with MetaMask via ethers.js for wallet connection, balance display, and token transfers.
 - Handled transaction signing, network detection, and common error states (rejected transactions, wrong network).
 - Tech:** Solidity, React.js, ethers.js, MetaMask, JavaScript
- Rakshak – Women's Safety Android App** | *Kotlin, Android*
- Developed an Android safety app featuring SOS alerts, live-location sharing, a safety timer, and safe-route mapping.
 - Designed user flows aimed at quick response in emergency scenarios and improving overall safety awareness.
 - Tech:** Kotlin, Android SDK
- Spam Email Detection Bot** | *Python, scikit-learn*
- Built a machine-learning-based spam classifier with a simple GUI for real-time predictions.
 - Applied SVM and Logistic Regression with TF-IDF preprocessing, achieving **~96% classification accuracy**.
 - Tech:** Python, scikit-learn, Tkinter, Pandas

ACHIEVEMENTS

- **1st Rank** – Leading Management Idea Hackathon (2025), among 200+ participants.
- **7th Rank** – Binary Blitz Hackathon (2024), among 200+ teams and 5,000+ participants.
- **1st Prize** – National Science Exhibition (2022).

EDUCATION

Lovely Professional University <i>B.Tech in Computer Science and Engineering</i> • CGPA: 7.51 / 10	Phagwara, Punjab <i>Aug 2022 – Present</i>
Sri Krishna Public School <i>Senior Secondary (Class XII) – 78%</i>	Jamshedpur, Jharkhand <i>Apr 2021 – Mar 2022</i>
Sri Krishna Public School <i>Secondary (Class X) – 92%</i>	Jamshedpur, Jharkhand <i>Apr 2019 – Mar 2020</i>
